

Distribution Line Card

Armalloy™

Specialty Resins Designed for the Sporting Industry

ABS

Lotte, Sabic, Chi Mei, Ineos —General Purpose, Hi Impact, FR, Clear

Acetal

DuPont, Celanese, YTH, Kepital —Impact Modified, Glass Reinforced

Acrylic

Arkema, Plaskolite, Cyro—General Purpose, Specialty Grades

Polycarbonate

Lotte, Sabic, Covestro, Mitsubishi,, AP Prime

Elastomers

United Soft Plastics—TPE, SBC, SEBS

Aurora Plastics—Rigid PVC

Sylvin PVC—Flexible, Rigid

APS — Elastomers

Dow Corning Siloxane—TiPsiV

Fluoropolymers

Kynar PVDF, Kynar Flex, Kynar Superflex, Kynar Ultraflex

PPO, PBT, PEI, PCABS

Lotte, Sabic, TriValence Polymers, AP Prime

Nylon 6, 6/6, 6/10, 6/12

DuPont, Radici, AP Prime—Glass, Mineral, Lubed, Supertuff

Custom Compounds

Atlantic Custom Resins, Cross Point Polymers, TriValence

Commodity Resins

The Plastics Group—Polypropylene Homopolymer, Copolymer

HIPS, Crystal Styrene, HDPE, LDPE, LLDPE

ARMALLOY™

an ISO 9001:2008 Registered Company

Atlantic Polymers is a leading distributor of thermoplastic materials. We have been delivering high quality engineering resin solutions to plastic processors for over 20 years.

Along with world-class products, we offer superior customer service along with expert technical support to ensure you get the service you deserve.

- Strategically Located Warehouses
- Custom Compounded Resins
- Certified Prime Resins
- Stocking Programs/Consignment
- Quality Resins. Unequaled Service.

Medical Grade Resins

Thermoplastic Prime and Compounded Resins for the Medical Device and Healthcare Industries

Atlantic Polymers specializes in thermoplastic resins for medical device applications, including materials intended for use in body-contact applications.

These applications include medical tubing, seals and closures, bags, bottles, catheters, single-use devices, sterilization trays, syringes, housings, etc.

Functional properties include radiopacity, radiation sterilization, autoclavability, chemical resistance, etc.

- Full Range of Biocompatible Resins
- USP Class VI / ISO 10993-1
- Regulatory Support
- Customization for New Applications

Custom Compounds

- Full range of thermoplastic resins including PC, ABS, HDPE, LDPE, PP, HIPS, Nylon, Acrylic, PBT, PET, Acetal, PEI, PEEK, PSU, PPSU, and more
- Antimicrobial agents, radiopacifiers, lubricants, UV and other additives

Kynar

- Key performance characteristics include high purity, resistance to repeated sterilization, bio-inert, gamma sterilizability
- *Superflex 2500-20* for chemical tubing and wire jacketing
- *Flex 2800-00* for chemical resistance and tubing
- *Rx 752* for biopharmaceutical and medical device industries
- *720* for a wide range of applications

United Soft Plastics

- TPE compounds based on SEBS block copolymers

Prime Certified Resins

- *Medical grades available from Sabic, DuPont, Arkema, BASF, and more*
